

INNOVATIVE PARTNERS. GLOBAL SOLUTIONS.™

INNOVATIVE PARTNERS. GLOBAL SOLUTIONS.™

For generations, Prestige Mold has been the global manufacturing leader of the highest-quality, competitively-priced precision injection molds. Supported by revolutionary technology and expert personnel, our success sets the standard for mold manufacturing excellence. Our commitment to superior service, absolute quality, flawless design, and incomparable products allows us to form long-term, dynamic partnerships. Our customers benefit from optimum manufacturability at lower overall costs. There's no doubt that our performance in providing design, manufacture, and testing of precision injection molds and turnkey system solutions is unmatched. As an integral partner in the process from concept to creation, it is our promise to make you successful.

OUR SUCCESS SETS THE STANDARD

CREATIVITY

The truest test of a mold is its design. At Prestige Mold we understand that creativity is crucial to the success of your concept. At Prestige, art-to-part is not just a slogan; it's a commitment. From the first design meeting to final production testing we are an integral partner in your success. Backed by proven innovative engineering and design processes, we create a database of the moldable part and design the ideal mold to meet exact specifications for perfect form, fit, and function time and time again. Our customers are ensured optimum molding cycles, higher productivity, greater efficiencies, and lower cost to manufacture their products.

“THE TRUEST TEST OF A MOLD IS ITS DESIGN.”

INNOVATION

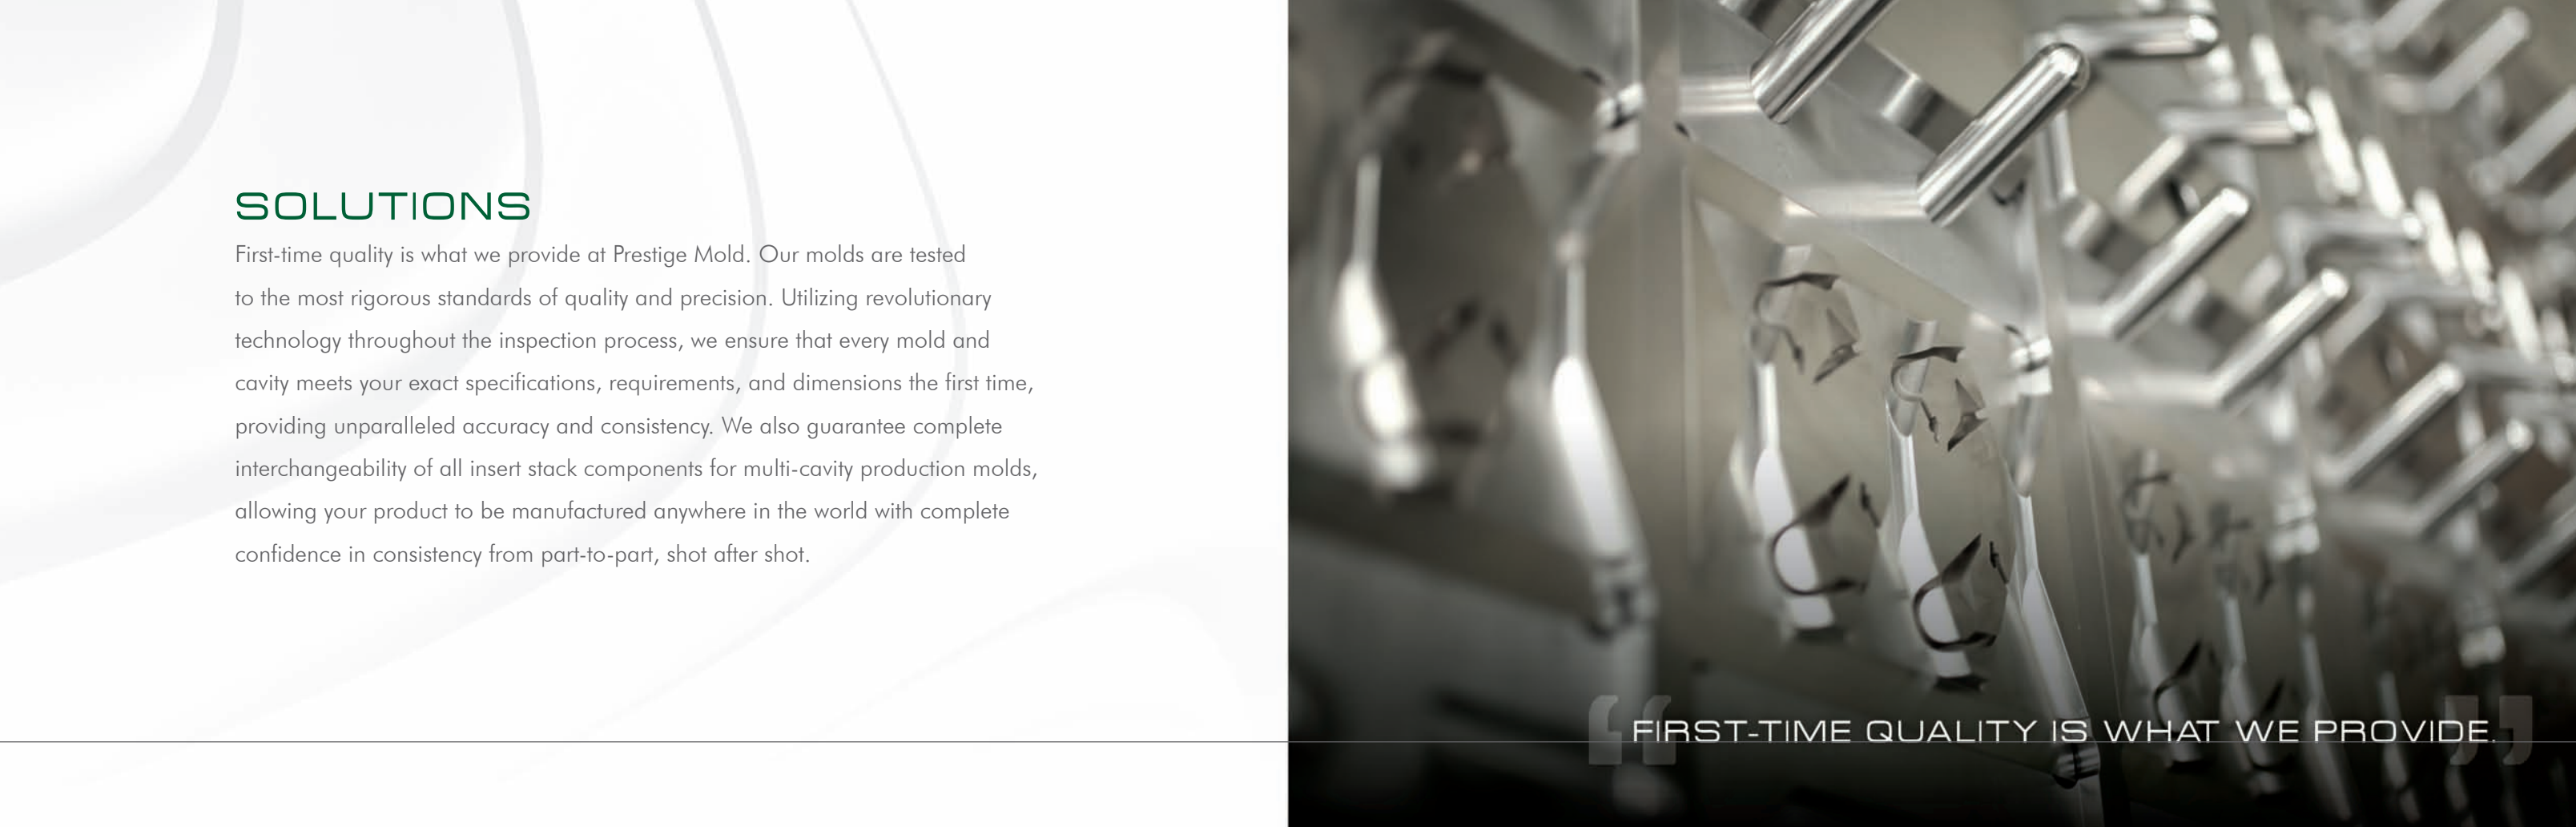

At Prestige Mold, we can turn any product idea into a reality. Production of high-quality, precision injection molds requires world-class technical innovation backed by highly-skilled craftsmen. That's why we have invested in the next generation of technology as well as the team of experts necessary to build molds requiring the most demanding specifications. Using the latest computer-aided design and mold manufacturing technology, including leading-edge automation and robotics, we are able to provide cavity-to-cavity repeatability and consistency cycle after cycle; total interchangeability ensures the highest possible level of productivity and reduced manufacturing time in a world where speed to market is critical to your success.

“WE CAN TURN ANY PRODUCT IDEA INTO A REALITY.”

SOLUTIONS

First-time quality is what we provide at Prestige Mold. Our molds are tested to the most rigorous standards of quality and precision. Utilizing revolutionary technology throughout the inspection process, we ensure that every mold and cavity meets your exact specifications, requirements, and dimensions the first time, providing unparalleled accuracy and consistency. We also guarantee complete interchangeability of all insert stack components for multi-cavity production molds, allowing your product to be manufactured anywhere in the world with complete confidence in consistency from part-to-part, shot after shot.

“FIRST-TIME QUALITY IS WHAT WE PROVIDE.”
